EXPERIENCE

IT Assistant
Inovare Accounting and Business Consulting

Aug. 2024 – Aug. 2025
Feira de Santana, BA, BR

- Responsible for the company's technology sector, including: customer service; diagnosis and troubleshooting; installation, configuration, documentation and maintenance of software;
- Refactored and optimized the institutional website using HTML, CSS, and JavaScript, reducing the total number of lines of code by 15%, removing redundancies, and improving performance;
- Developed the website's responsive layout, ensuring a consistent user experience across desktops, tablets, and mobile phones.
- Implemented new features, such as a theme selector (light/dark), and updated the design to reflect the company's visual identity.
- Managed the website hosting platform with Hostoo.io and the content management system (CMS) WordPress.
- Conducted training on the use of new technologies for staff and clients, simplifying technical concepts for internal and external audiences.

Administrative Assistant
Inkasa Shop Market 24H

Oct. 2022 – July 2024
Feira de Santana, BA, BR

- Helped recover 80% of the profit lost due to transaction inconsistencies every month;
- Monitored security cameras in autonomous grocery stores across 15 condominiums;
- Used agile methodologies for continuous flow of tasks in the office;
- Responsible for customer service;

PROJECTS

IF - Talentos | *HTML5/CSS3, JavaScript (ES6), PHP 8, PostgreSQL, GitHub*

Aug. 2025 – Present

- Developed a full-stack platform using PHP and PostgreSQL to create a direct bridge between Information Systems students and the job market, as a potential solution for the high dropout rate and difficulty in obtaining mandatory internships in the academic community.
- Designed and implemented the back-end architecture and relational database, ensuring system security with authentication and encrypted passwords, and ecosystem integrity through a curation and approval flow for job postings by administrators.
- Developed the front-end interface with HTML, CSS and JavaScript, implementing a multi-profile system (Student, Company, Admin), an administration panel with data visualization to monitor platform health, and a progressive profile system to increase user engagement.

Java Games Collection | *Java, IntelliJ, GitHub*

Apr. 2024 – May 2025

- Developed recreations of 12 classic games in Java, including: Pac Man, Sudoku, Minesweeper, Space Invaders and Flappy Bird;
- Applied OOP and interactive graphical interfaces concepts, through Java Swing and AWT;
- Implemented game mechanics, managed state and conditions, handled user inputs, and created 2D boards.
